

## Finding a Solar Keymark Certification Body

### What are empowered Certification Bodies?

Third party certification schemes for solar thermal products such as the Solar Keymark require the use of accredited testing laboratories that perform their tasks according to ISO/IEC 17025:2005.

Besides, they must also comply with the specific rules of the certification scheme, including the relevant standards applicable for the products under the scope of the scheme.

Certification Bodies able to issue Solar Keymark licenses are empowered by CEN Certification Board.

Each of these Certification Bodies is entitled to indicate the test laboratories recognized by them to perform tests, as foreseen by the Solar Keymark scheme rules.

### Which are the empowered Certification Bodies?

There is a list of Certification Bodies empowered by CEN Certification Board for issuing Solar Keymark licenses available at the [Solar Keymark](#) website. We recommend a visit to this website for an updated list and more detailed information, namely the test-labs recognised by each Certification Body.

- **[AENOR \(ES\)](#)** - collectors (EN12975)  
CI Génova, 6  
28004 Madrid, Spain
